Quality Provider Networks

Ensure the Right Care at Home

More Care in the Home

● Transition of Care

Leveraging analytics with a home-first approach will identify the right time to direct members to the appropriate next site of care.

● HomeFirst Analytics

HomeFirst Analytics identifies the appropriate time to direct members to the next site of care, including the home.

- 80% of members could recover at home instead of SNFs.
- 85% of sleep testing can be redirected to the home.

Source: 2022 CareCentrix Data

● Reduction in SNF and Hospital Days

Higher member satisfaction receiving necessary treatments in the comfort of their home with an 18% reduction in total Skilled Nursing Facility (SNF) days.
